Learning Question:

我们怎么读懂学校设施的信息?

How can we use reading strategies to find key facility details?

Level	Success Criteria
Meeting	I can recognise and read key facility vocabulary in the texts. I can locate facility words when given an English prompt.
Exceeding	I can retrieve specific details (numbers, sequence, location) to answer comprehension questions. I can use context clues to work out unfamiliar facility words.
Mastering	I can compare the two texts and explain how their purpose and tone differ. I can infer information the text implies but doesn't state, using 因为.....所以.....

在 / 是 / 有

- 在、是、有 all describe location, but word order changes with each verb.

1. 游泳池在体育馆里面。

2. 幼儿园的对面是一个公园。

3. 篮球场的旁边有两个网球场。

在 / 是 / 有

在 (zài) — "is located at"

Place/Thing + 在 + Location.

(Something IS somewhere.)

是 (shì) — "is"

Location + 是 + Place/Thing.

(A location IS defined by what's there — used to say what a place is.)

有 (yǒu) — "has / there is"

Location + 有 + Place/Thing.

(A location HAS something in it.)

在 / 是 / 有

Quick way to remember them: start with the thing you're describing.

- If you start with the **place/thing** → use 在
- If you start with the **location** and want to say what it IS → use 是
- If you start with the **location** and want to say what's THERE → use 有
