Exercise 7.4B Camouflaged caterpillars

1 How many green caterpillars and how many yellow caterpillars Marcus picks up.

2 Repeat the experiment five times with the same caterpillars, using five different students to collect them.

3 D1, B2, A3, E4, C5

Exercise 7.4C Woolly mammoths

Look for the following ideas somewhere in the answer:

- variation in the steppe mammoths – some have longer fur and longer tusks
- these were better adapted to survive when the climate got colder
- steppe mammoths with short fur and short tusks were less likely to survive
- most reproduction was done by individuals with long fur and long tusks
- genes for these characteristics were passed on to offspring
- over time, more mammoths in the population came to have long fur and long tusks.
