Week 4

Fanfare Recap

Learning Question

How does ensemble balance and pulse create power in a musical fanfare?

Learning Question: How does ensemble balance and pulse create power in a musical fanfare?

SUCCESS CRITERIA

(1) ✅ Meeting	• Identify how a steady backing pulse bassline or crotchet note rhythm holds the fanfare together. • Play in time with a peer anchor or visual cues.
(2) 🚀 Exceeding	• Explain and demonstrate how dynamic balance allows the lead fanfare motif to sit clearly over the accompaniment. • Maintain steady triplet and dotted rhythms cleanly "in the pocket" without rushing or dragging.
(3) 👑 Mastering	• Evaluate how adding decorative variations (turns, octave doubling, counter-rhythms) enhances the overall power and texture of the fanfare. • Lead a sectional group to maintain pulse stability and dynamic contrast.

STARTER

What is this called? What does it mean?

Learning Question: How does ensemble balance and pulse create power in a musical fanfare?

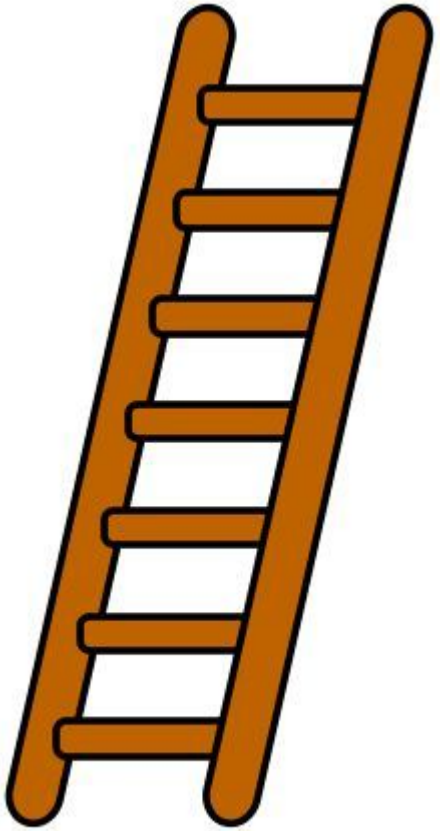

Warm Up – Rhythm Ladder

Bar 1: 4 Crotchet Notes (1, 2, 3, 4)

Bar 2: 4 Triplet Groups (12 total eighth-note triplets)

Bar 3: Alternating Beats (Crotchet, Triplet, Crotchet, Triplet)

Bar 4: Whole Note (Concert A) to resolve and check tuning.

Learning Question: How does ensemble balance and pulse create power in a musical fanfare?

Zelda Intro (Bars 1–4)

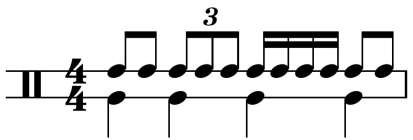

⏱️ **Tempo**: Practice at 80 BPM → Target: 120 BPM

📣 **Dynamic**: f (Forte = Loud, bold, and heroic)

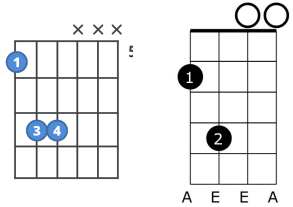

🎯 **Key Goal**: Lock in the driving triplet pulse together as an ensemble

Rhythm Reminder:

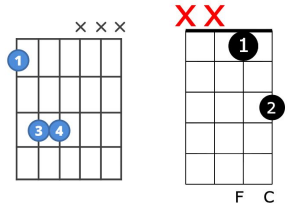

Guitar/ukulele chords:

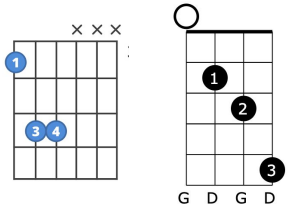

Bar 1: A5

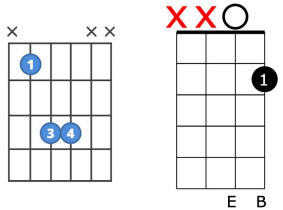

Bar 3: F5

Bar 2: G5

Bar 4: E5

Learning Question: How does ensemble balance and pulse create power in a musical fanfare?

Reflection

On a scale of 1–4, how effectively did your playing help create power in our fanfare today? Explain your reason.

1	**Off-Beat**: I struggled to stay with the rhythm section or was too loud/quiet for my part.
2	**Holding On**: I kept the pulse mostly steady, but lost balance during tricky triplet/dotted rhythms.
3	**In the Pocket**: I played in tight sync with the rhythm section and adjusted my volume to balance the team.
4	**Producer Level**: I maintained perfect pulse, balanced my texture, and added decorative/leading details that lifted the whole group.
