Common Assessment Template
Design and Technology

Focus of assessment:
Design and Technology - "Product in a Tin" project
Students will demonstrate their understanding of the design process through a written and visual assessment covering key design knowledge, idea generation, development, and evaluation.

Date of Assessment: Friday 20th November

Description of assessment
Written and illustrated design paper (35 marks total).
Students will complete a combination of short written answers and annotated sketches demonstrating their understanding of design briefs, materials, design development, target users, quality control, and evaluation.

Assessment objectives/Marking criteria/skills being assessed/success criteria:

- Demonstrate knowledge and understanding of design terminology and processes.
- Generate and communicate creative design ideas through annotated sketches and drawings.
- Apply design thinking to explain decisions, justify choices, and reflect on the design process.
- Use correct design vocabulary to describe, analyse and evaluate work.

(Total 50 marks: Section A Knowledge, Section B Design Ideas, Section C Application, Section D Reflection.)

Suggested Revision Approaches:

- Review key terminology and concepts introduced this term.
- Reflect on your design process and development stages.
- Revisit e-portfolio work and class notes.
- Practise communicating design ideas visually and verbally.
- Ensure familiarity with design-related vocabulary and techniques.
