Page	Unit	Science strand	Thinking and Working Scientifically strand	Science in Context
8	1 Photosynthesis and the carbon cycle	Biology: Structure and function	Carrying out scientific enquiry	Discuss how scientific knowledge develops over time by shared understanding and investigation.
8	1.1 Photosynthesis		Scientific enquiry: purpose and planning	
15	1.2 More about photosynthesis	Earth and space: Cycles on Earth		
24	1.3 The carbon cycle			
34	1.4 Climate change			
48	2 Properties of materials	Chemistry: Materials and their structure	Models and representations	Discuss how scientific knowledge develops over time by shared understanding and investigation.
48	2.1 Atomic structure and the Periodic Table	Chemistry: Properties of materials		
53	2.2 Trends in groups within the Periodic Table	Chemistry: Changes to materials		
60	2.3 Why elements react to form compounds			
71	2.4 Simple and giant structures			
84	3 Forces and energy	Physics: Forces and energy	Carrying out scientific enquiry	Discuss how scientific understanding is used and developed by people working on their own and working together such as the peer-review process.
84	3.1 Density	Chemistry: Properties of materials	Scientific enquiry: analysis, evaluation and conclusions	
98	3.2 Heat and temperature		Scientific enquiry: purpose and planning	
106	3.3 Conservation of energy			
112	3.4 Moving from hot to cold			
119	3.5 Ways of transferring thermal energy			
130	3.6 Cooling by evaporation			
142	4 Maintaining life	Biology: Life processes	Models and representations	Evaluate topics using scientific understanding.
142	4.1 Plants and water		Carrying out scientific enquiry	Discuss how scientific knowledge develops over time by shared understanding and investigation.
148	4.2 Transpiration		Scientific enquiry: analysis, evaluation and conclusions	
155	4.3 Excretion in humans			
159	4.4 Keeping a fetus healthy			
168	5 Reactivity	Chemistry: Changes to materials	Models and representations	Describe how science is used in different societies and industries, and how it is used in research.
168	5.1 Reactivity and displacement reactions		Scientific enquiry: purpose and planning	
174	5.2 Using the reactivity series and displacement reactions			
179	5.3 Salts			
187	5.4 Other ways of making salts			
194	5.5 Rearranging atoms
