Week 8

Sections B and C

Learning Question

How do different instrumental parts fit together to create a balanced ensemble performance?

Learning Question: How do different instrumental parts fit together to create a balanced ensemble performance?

SUCCESS CRITERIA

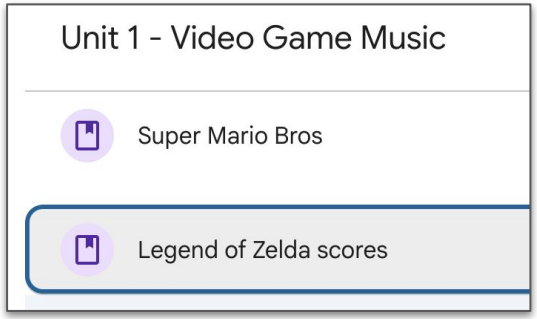

(1) ✅ Meeting	• I can play my allocated part accurately in time through the entire structural progression (Fanfare - A - B - C) without losing the ensemble pulse. • I can execute all marked dynamic changes cleanly at key structural transitions (especially into Section C).
(2) 🚀 Exceeding	• I can maintain precise rhythmic interlocking with other layers, adjusting my playing volume so lead sub-melodies project cleanly over accompaniment parts. • I can navigate all structural "seams" (transitions between sections) smoothly without rushing or dragging the tempo.
(3) 👑 Mastering	• I can anchor my section's timing and entry points across all structural transitions, guiding ensemble balance and dynamic shaping. • I can critically evaluate an ensemble take to identify specific structural or textural balance issues across all instrument layers.

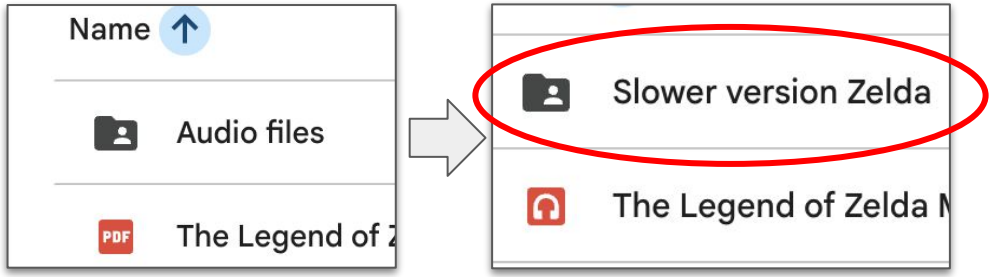

Learning Question: How do different instrumental parts fit together to create a balanced ensemble performance?

Individual Practice – Intro/A/B/C

Open the Zelda scores on Google Classroom.

Find your audio file (slower version) and work with people on the same part.

Learning Question: How do different instrumental parts fit together to create a balanced ensemble performance?

Intro-A-B-C

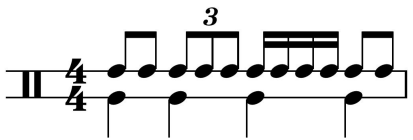

⏱️ **Tempo**: Practice at 80 BPM → Target: 120 BPM

🔊 **Dynamic**: Section B = mf (Balanced) Section C = p (quiet)

🎯 **Key Goal**: Balance background layers so the Section B sub-melody cuts through, then execute the joint dynamic shift at Section C together

Rhythm

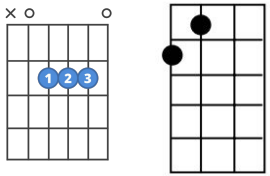

Reminder:

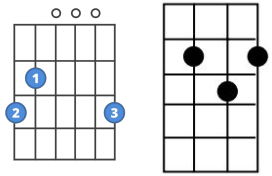

Guitar/Ukulele chords:

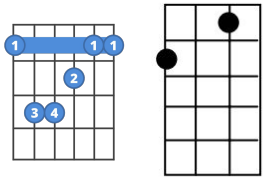

Bar 1: A

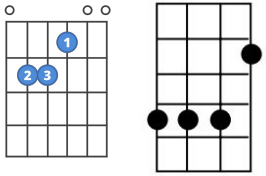

Bar 2: G

Bar 3: F

Bar 4: E

Learning Question: How do different instrumental parts fit together to create a balanced ensemble performance?

REFLECTION

(1) ✅ Meeting	• Play Intro/A/B/C accurately and in time • Change to piano (quiet) for C section
(2) 🚀 Exceeding	• Play Intro/A/B/C with an awareness of other parts. • Adjust my volume to allow other parts to be heard
(3) 👑 Mastering	• Lead your section's timing and entry • Evaluate our performance and identify balance and timing issues

My Level Today: (Meeting / Exceeding / Mastering)

My Evidence: "In Section [B or C], my part was..."

Next Step: What you need to adjust for next lesson.
