Week 5

Main Theme

Learning Question

How do dynamic contrast and harmonic flow give a musical theme its narrative tension?

Learning Question: How does ensemble balance and pulse create power in a musical fanfare?

SUCCESS CRITERIA

(1) ✅ Meeting	• I can follow the primary chord changes (A-G-F-E) in time with the rhythm section. • I can identify where the Section A main theme rises and falls in dynamics.
(2) 🚀 Exceeding	• I can execute the Section A core theme with accurate phrasing, smooth chord transitions, and clear dynamic contrast. • I can maintain steady ensemble pulse while transitioning smoothly from the Fanfare into Section A.
(3) 👑 Mastering	• I can evaluate how subtle changes in articulation, counter-melody, or dynamic expression increase narrative tension in Section A. • I can lead my group's section to shape phrase endings cleanly and balance accompaniment against the lead melody.

Reflection

If today's rehearsal of Bars 5–12 was a video game level, where did you leave your Save State?

🎮 **Level 1**: Still mapping out where my fingers go for these notes/chords.

🎮 **Level 2**: Got the first half of the notes down, but hit a wall on the second half.

🎮 **Stage Cleared!** Assembled the whole 8-bar section without dropping notes.

What is the main 'glitch' (wrong note, missed chord change) you need to fix before next class?
