Intervals

Interval Quantity

Interval Quality

Perfect and Major intervals

When the upper note belongs to the major scale beginning on the lower note, the interval's quality is said to be major or perfect depending on the quantity:

- Perfect – Unison, 4th, 5th, Octave
- Major – 2nd, 3rd, 6th, 7th

Minor intervals

When a major interval is lowered by one semitone, its quality becomes minor.

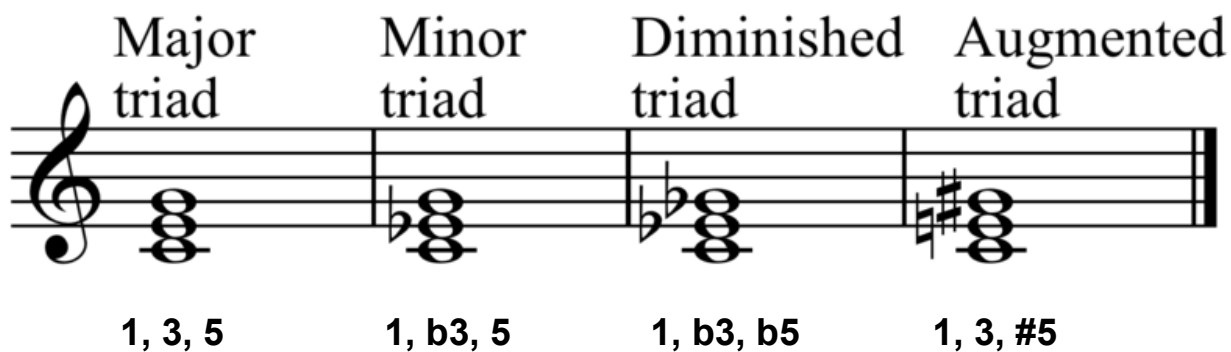

Other Qualities

Diminished intervals occur when a perfect interval is lowered by a semitone.

Augmented intervals occur when a perfect or major interval is raised by a semitone.
